

UNLOCKING THE power of CUTTING-EDGE DESIGN SOLUTIONS.

Roussey Companies provides an array of on-site services for clients within the Mid-Atlantic area and collaborates with clients nationwide via the Web.

We'll provide you with any of the following utility design services:

- **World-class Design Software**
- **Design services from start to finish**
- **Design services after you do the fieldwork and permitting**

We have the flexibility to meet your needs.

Leading the way is our innovative ADDS software module. ADDS optimizes URD designs for electric utilities and provides a competitive edge by saving time and material in the construction phase. Also, ADDS reduces design time significantly. The results are developments that are cost-effective while meeting electrical design criteria. Plus, ADDS engineering parameters can be completely customized to meet your specifications. ADDS can be used as part of an overall strategy to automate all mapping functions or as a superior tool for individual projects.

Engineering Know-how... and the Technology to match.

A REPUTATION BUILT ON

innovation.

Roussey Companies is the exciting union of professional engineering know-how and cutting edge technology.

Since 1985, Roussey Companies has provided a wide range of consulting services to the electric, gas, telephone and telecommunication utility industries. As the need for new and more efficient design practices arose, Roussey Companies has created innovative software applications that automate and optimize its design services.

Through state-of-the-art technology, we do work for utilities that would otherwise remain in-house. In fact, our ADDS software is unmatched in its flexibility and accuracy. The result is world-class designs in less time that save money and increase productivity. What's more, we have a team of over 40 experienced professionals who possess a working knowledge of the industries we serve and URD engineering. This gives us a unique advantage in helping our clients adapt to and thrive in a competitive and changing marketplace.

Roussey Companies has attracted clients nationwide who need underground residential utility design, overhead electric design, fiber optic routing design, construction management and engineering software. We've built a solid reputation through progressive solutions...and we'll continue to lead the way!

Roussey Services Include:

Electric & Gas Design

- ▼ New commercial and residential designs as well as infrastructure maintenance and upgrade projects
- ▼ Aerial and underground design for new or existing facilities
- ▼ Permitting for state and local roadways as well as bridge and underwater crossings

Telecommunication Design

- ▼ OSP route designs for aerial and underground infrastructures
- ▼ New designs and permits for areas without pre-existing capacities
- ▼ Flexible designs that can coordinate OSP with ISP

Fiber Optic Splicing & Testing Services

- ▼ OSP and ISP projects with single and ribbon fiber optic cable splicing
- ▼ Dual Wave OTDR Testing (Bi-directional traces & power test evaluation)
- ▼ Roussey has confined space, railroad, and CO vendor certifications

Quality Digital Output

- ▼ MicroStation Design format
- ▼ AutoCAD DWG format
- ▼ DXF Translation format
- ▼ Shapefiles

Recent clients:

PECO Energy, PECO-Hyperion, Exelon Infrastructure Services, Conectiv, Detroit Edison, Verizon, Middletown Public Works, MetroMedia Fiber Network Services (MFN), IXC, Commonwealth Telecommunication Services (CTSI) and RCN, University of Pennsylvania, Nextlink
